OUR CABLE LETTER.

Edmund Yates' Gossip About Royalty—The Queen's Health.

The Queen's Fortune and Savings—The Prince of Wales' Gout.

[By Postal Telegraph.]

New York, July 23.—Edmund Yates' London cable to the *Tribune* says: The Queen has quite recovered from a very bad attack of lumbago and sciatica, from which she was suffering so badly a fortnight ago, and can walk and move about with ease. Colder weather has conduced much to her recovery. She was looking very much better the day she left Windsor.

If the amount of the Queen's savings is as large as reported, namely, over £800,000, she must have a large private fortune. She has purchased Balmoral and Osborne, which cannot represent less, with outlying properties which she is always acquiring, than half a million more, exclusive of Claremont, for which she paid a very large sum. She has, it is said, given a large fortune to some of her daughters on their marriage, as well as to her granddaughters, the children of the Grand Duke of Hesse, to the amount of £30,000. Her savings, therefore, in round numbers are something like £1,600,000. There is one item of the Queen's expenditure which has always been overlooked, or entirely forgotten, namely, the large sums which she has spent on memorials to the Prince Consort. The Albert memorial is said to have cost over £100,000. She has restored St. George's chapel, Windsor, in a most lavish manner, and must have spent vast sums at Frogmore on the mausoleum. It is said by those well able to judge her expenditure that on this one item alone it has been nearly £60,000, which brings us beyond two millions which the queen is believed to have saved.

The Prince of Wales is better than he was, but has been suffering from gout in the eyes and legs which had been cured some time, but began to trouble him again. He is undoubtedly worried by opposition to the royal grants.

Invitations to the royal marriage can barely exceed fifty, so that many well known friends of the Prince and Princess will, of necessity, be absent.

The Duchess of Abercorn has worked very hard as head of the ladies present committee and has the advantage of active co-operation of such experienced organizers as Lady Gray, the Duchesses of St. Albans and Roxburgh, "Lady A" and Lady Rosebery. The list has been strictly confined to personal acquaintances.

The Prince of Wales met Boulanger at Lord Randolph Churchill's Wednesday evening's ball, probably one of the most remarkable ever given in Connaught place. The table was profusely decorated with roses and as all the ladies present were going off to Mrs. Oppenheim's concert and ball the display of jewels was unusually fine.

SPORTS AND PASTIMES.

O'Connor in England—The Valkyrie Sails for America.

To look at O'Connor one would be impressed at once with the fact that he is in his golden prime. He is 26 years of age, and what may be done with a pair of sculls and a Roddock skull he would lead you believe he can do, and although he is not nearly as powerful as many of the ex-champions, he is muscular and strong without being clumsy. He is of very symmetric build; his constitution is excellent; he abounds in resolution, and is conformable to George W. Lee, his careful trainer.

When asked if he thought the English climate would affect him, he remarked that he had always heard that Americans invariably did better over here than there, for the English climate being so much cooler, enabled a man to train harder, eat more and sleep better, although he would not rely on this supposed advantage. He spoke with great confidence about his chances with the Australian, and says that if he is defeated it will not be because he has not prepared himself properly.—*Sportsman.*

DARBY AT THE BAT.

There was one in Casey's manner as he stepped into his place;
There was pride in Casey's bearing and a smile on Casey's face.
And when, responding to the cheers, he lightly doffed his hat,
No stranger in the crowd could doubt 'twas Casey at the bat.

Ten thousand eyes were on him as he rubbed his hands with dirt.
Five thousand tongues applauded when he wiped them on his shirt.
Then while the writhing pitcher ground the ball into his hip,
Defiance gleamed in Casey's eyes, a sneer curled Casey's lip.

And now the leather-covered sphere came hurtling through the air,
And Casey stood a-watching it in haughty grandeur there.
Close by the sturdy batsman the ball unheeded sped—
"That ain't my style," said Casey. "Strike one," the umpire said.

From the benches, black with people, there went up a muffled roar,
Like the beating of the storm waves on a stern and distant shore.
"Kill him!" "Kill the umpire!" shouted some one on the stand,
And it's likely they'd have killed him had not Casey raised his hand.

With a smile of Christian charity Pat Casey's visage shone;
He stilled the rising tumult, he bade the game go on.
He signalled to the pitcher, and once more the spheroid flew;
But Casey still ignored it, and the umpire said, "Strike two."

"Fraud!" cried the maddened thousands, and echo answered "Fraud!"
But one stern look from Patsy and the auditory was awed.
They saw his face grow stern and cold, they saw his muscles strain,
And they knew that Casey wouldn't let that ball go by again.

The sneer is gone from Casey's lips, his teeth are clinched in hate,
He pounds with cruel violence his bat upon the plate.
And now the pitcher holds the ball, and now he lets it go,
And now the air is shattered by the force of Casey's blow.

Oh, somewhere in this favored land the sun is shining bright,
The band is playing somewhere and somewhere hearts are light,
And somewhere men are laughing, and somewhere children shout,
But there is no joy in James Bay, Pat Casey has struck out.

THE ENGLISH YACHT SAILS.

The Valkyrie sailed for America from Southampton on the 15th inst. Tom Draper will have charge of her in the American matches.

A WELL-KNOWN CRICKETER.

It will be remembered that some years ago Mr. G. B. Studd, the well-known English cricketer, gave up cricket to go as a missionary to China. It appears that he has now introduced the game among his converts, he himself playing in native costume.

HOW SULLIVAN WILL DIE.

Sullivan will die of apoplexy, sooner or later. His mode of living, his build, his movements indicate this in the strongest coloring to those who have ever met the bruiser. A prize fighter's life at best is an anomaly. It is not by any means the happy lot pictured by imaginative newspaper writers, and the wear and tear on the system of one who is put in training for a fistic affray is calculated to produce direful results sooner or later. Therefore, to a very great extent Sullivan's life is in his own hands. Brute that he is, his animal strength cannot always last. With its departure would mean ruin for the bruiser whose like will not be seen by any one of the present generation. It is just possible that Sullivan may understand this and take advantage of the belief thought by many that he would be unwise to foolishly waste his share of the recent contest in Mississippi.

ONE HUNDRED YARD RACE.

B. Hall defeated E. A. Wade in the 100 yard race at Beacon Hill last evening, Mr. Wade failed to start at the word "go" and was left on the scratch.

BASEBALL.

The young Amities and Junior Diamonds played a game of baseball on the college grounds on Monday afternoon. The Amities won with a score of 22 to 15 runs made by the Diamonds.

NOTES.

Thirty and forty turn out to lacrosse practice now in New Westminster. In three months the *Columbian* thinks a team can be selected there which will take the cake.

REGULATIONS.

The prize list of the B. C. Rifle Association which meets at New Westminster on the 7th of August is issued. There will be eighteen competitions, including the "extra series" in all of which fairly good prizes are offered. The regulations, etc, are made the same as in previous years excepting that one or two additions have been made. One of the new clauses allows two sighting shots at each range at a cost of ten cents each.

Railway Shares.

Northern Pacific are still declining, standing now at 25½. They were 29½ at the date of Mr. Villard's visit. Canadian Pacific are steady at 55 to 56 in New York, and 57 to 58 in London. Grand Trunk are 10½ to 10⅝ in London.

Application for Bail.

Samuel Pearce, the young man committed for trial on three charges of alleged embezzlement, was removed to the Provincial jail this afternoon. In the Supreme Court to-morrow application will be made in his behalf to be allowed out on bail. His mother is prostrated with grief over her son's predicament.

Tacoma Fire Department.

The Tacoma city council passed a resolution on Saturday last to purchase two Silsby steam fire engines and to pay the following monthly salaries to the officers and men of the fire department: Chief, $125; assistant chief, $30; engineers, $20; drivers, $75; firemen, $70; secretary, $10; call men, $10.

Kootenay Notes.

The wagon road from Nelson to Sproat's Landing is a necessity to the rapid development of that promising region.

The smelting and reduction works being erected at Revelstoke are in good hands, with ample capital to do their part.

Kootenay district will come to the front as the best mineral region in North America.

Calgary Crops.

The Calgary *Tribune* denies the report that the crops and garden stuff had been frozen around Calgary and says: "Throughout the whole district we have not heard of any damage either to crops or garden stuff. True we did have one or two slight frosts this summer, but potatoes, beans, tomatoes and other garden stuff is as luxuriant as if grown in a hot house. Some of our people had green peas grown in the open air from their own gardens on the fourth of July, and new potatoes on the twelfth. Grain of every kind is rich and rank, and certainly no one who has seen this country, can speak the truth and say that we have sustained the slightest damage by frost."

Saved From Drowning.

Another young man who could not swim came near losing his life at Nanaimo Saturday evening. The *Free Press* says: "On Saturday evening a man named William Smith, went into the water near Cameron Island for a bath. He got beyond his depth, and being unable to swim, he was on the point of drowning, when Mr. Chas. Marshall hearing the alarm, jumped off the old boathouse and rescued Smith just as he was going down for the last time. When taken from the water Smith was unconscious and it required several minutes energetic work to bring him round." Marshall's action was a plucky one.

Texada Iron Mines.

A survey has been made from the Texada Iron Mines to a point four miles distant will be more convenient for the shipment of ore than the place at present in use. A wharf will be built at the termination of the railroad, which will add greatly to the value of the property of the Iron Mining Company.

Several English capitalists have been looking over the property of the Texada Iron Mining Company, with a view to purchasing it and running the works in company with another claim on the island which contains large deposits of iron ore.

The capitalists express themselves well satisfied that the quality of Texada iron ore is very fine.

Unexpected Enthusiasm.

The members of the Westminster militia are not fond of dancing. A meeting was called for last night to discuss the question of giving a dance next month while the annual prize meeting of the Provincial Rifle Association was in progress, and when military visitors would be in town. The meeting was attended by one officer and three privates of the rifles and one non-commissioned officer of the artillery. After waiting half an hour the dancing enthusiasts separated without holding a meeting, as they thought a ball that could only muster a "four hand reel" or "French four" would not be an unparalleled success. It is sincerely to be trusted that our militia will never be ordered out for active service, for it would be too bad to make them "rustle" for once.—*Columbian.*

Children Cry for Pitcher's Castoria.

TO-DAY'S DISPATCHES.

A Golden Wedding Monument—The French Political Situation.

Christopher Columbus to be Canonized—Increasing the Navy.

[By Postal Telegraph.]

London, July 23.—The people of Hawarden propose to erect a monument in commemoration of the golden wedding of Mr. and Mrs. Gladstone.

BLOW AT BOULANGER.

Paris, July 23.—An order was issued by the High Court of Justice to-day depriving General Boulanger and Count Dillon of their civil and political rights in France and declaring them ineligible for election to any office.

Forty more Boulangist office holders were yesterday dismissed from various offices.

ROYAL FUNERAL.

Copenhagen, July 23.—A number of royal families and representatives of the Czar and of King Oscar of Sweden, will be present at the funeral of Princess Augusta of Hesse, sister of the Queen.

SIR JOHN'S "NO."

Ottawa, July 23.—The fact that the Hon. Chapleau has retired from the directorate of several railroads with which he is connected, is said here to be an omen that he is to be Minister of Railways and Canals. Mr. Chapleau may be paving the way, but Sir John saith emphatically, "no."

FIVE TO SWING.

New York, July 23.—Sentence of death was passed to-day on the murderers, Chas. Gibbon and Henry Carleton, Aug. 3rd being the date fixed. There are now five condemned murders to be executed here on that day. They are John Lewis, colored, James Nolan, Patrick Packenham, Charles Gibbon and Henry Carleton.

FRENCH POLITICS.

New York, July 23.—*Le Courier*, commenting this morning on the French political situation says editorially: "The grave feature is the distrust which Boulangerism throws into the Republican ranks. It is certain it leads them to profit by the reaction, that is strongest in the effect it exercises on persons actively sincere, but victims of gross deception and blindness, from which they will recover with difficulty. French electors will have no difficulty in distinguishing the game of the Monarchists. They will have more in perceiving that of Boulangerism, but when they do divine the end will soon come to the incredible scheme which has confused the popular good sense and which will perish miserably.

BRITAIN'S NAVY.

London, July 22.—In the commons this evening, Sir James Ferguson said that the final programme for the maritime conference with America had not yet been agreed upon. Lord George Hamilton announced that the construction of 62 war ships had been begun during the current year, twenty of which were building at the government dock yards and thirty-two at private yards.

THE WHITECHAPEL CRIMES.

London, July 22.—Excitement over the latest Whitechapel murder is dying out, despite the efforts of the police to show their activity by arresting all kinds of ragged men on slender suspicion, and by assisting news agents to send exaggerated stories of stabbing affairs as fresh exploits of the Ripper; two assaults which started the town Saturday morning had nothing in common with the Whitechapel crime, except that they took place in that vicinity, among the same class of people. They were merely a little blood letting by two drunken sailors who tried to prevent themselves from being robbed by a dissolute woman. One of them was so brutal that if there had not been some interference on the part of the police he surely would have been strung up to the nearest lamp post. As far as the capture of the real Whitechapel assassin is concerned, the police are utterly at sea.

FROM LONDON.

London, July 22.—Wm. O'Brien will move for a new trial of his libel suit against Lord Salisbury on the ground that the jury that returned the verdict in favor of the premier was misdirected.

A reinforcement of 800 British troops have been sent to Assouan from Cairo.

In the commons, this evening, on motion of Wm. H Smith, the report of the committee on royal grants was tabled. The report recommends an addition £9000 to Prince of Wales and maintaining the right of the Queen to ask parliament for a further provision for her grandchildren. The debate on the report was postponed until Thursday.

ST. CHRISTOPHER COLUMBUS.

London, July 22.—A Rome dispatch says that the holy pontiff is very favorably impressed with the suggestion that Christopher Columbus be canonized upon the anniversary of the discovery of America. From private sources at the Vatican it is also learned that the occasion may be signalized by the bestowal of the cardinal's hat upon two American bishops, and the conferring of high honors upon a number of American laymen, whose devotion to the church and munificence in its behalf have gained them international fame.

RUSSIA ENCOURAGING DESERTION.

London, July 22.—At Demtresch, near Adrianople, Russian agents are collecting soldiers who desert from the Bulgarian army at different points along the frontier. The Russians pay them liberally, give them alluring promises of early employment, and thus encourage desertion all over Bulgaria. Just what object the Russians seem to accomplish by this manoeuvre is not clear. The matter has been brought to the attention of the Bulgarian representatives at St. Petersburg, with instructions to request an explanation.

WAR IN AFRICA.

The Report of Capt. Wissman's Operations in Africa Made Public.

Berlin, July 23.—The official report of the German military operations in Western Africa is published and contains some facts not yet cabled to American papers. The principal features of the campaign are already known. Capt. Wissman attacked and occupied the camp of Buschiri, but he was himself wounded. His adversaries lost 100 men in the fight; the German loss was three white and six black men killed. Four marines and three Soudanese were wounded. Capt. Wissman says his victory and destruction of native camps, if not decisive, is at least very important in its bearings on the African question. The march, under a torrid sun and in pestilential atmosphere and through dense vegetation, was very difficult. On the return the whole line of march was disorganized. Many white soldiers had to be escried by the blacks, all of which proves that the use of European soldiers in such expeditions must necessarily be limited. Capt. Wissman says a high tribute must be paid to the bravery of the Soudanese allies. The report notes that a German explorer has for the first time made use of horses in his operations, and dwells on the advantage which horsemen have in rising above high grasses when in the saddle. It is believed, however, that the climatic conditions of Western Africa will prevent the importation of horses in large numbers.

RAILROAD DIFFICULTY.

The Transcontinental Association in Peril.

Chicago, July 22.—A meeting which is probably to determine the fate of the Transcontinental Railway association began here to-day, but owing to the absence of several representatives of important lines, adjourned until Monday next.

The association has just reached a critical period of its existence, both the Southern and the Northern Pacific roads having given notice of withdrawal. Should they persist in their intention, it would be folly to attempt to continue the association. Efforts will be made to persuade them to reconsider their action and in the case of the Northern Pacific there is hope of success.

Traffic Manager Hannaford said that he thought the matter would be amicably adjusted as far as his road was concerned, but the grievance of the Southern Pacific is the competition of the Canadian Pacific. It claims that the unreasonable differentials allowed that road, coupled with its freedom from legal restrictions, has enabled it to absorb the bulk of the Pacific coast traffic, and American lines are powerless to meet the competition while remaining members of the association.

Strangely enough representatives of the Canadian Pacific are in attendance asking still further differentials on San Francisco traffic, so the prospect for an adjustment of the existing difficulties is not bright.

THE FRENCH MUDDLE.

Boulanger and Associates Issue a Manifesto to Electors.

London, July 22.—Gen. Boulanger, Count Dillon and M. Rochefort have issued the following manifesto:

To French Electors: We have disdained to reply to the absurd calumnies concocted by ministers who have been convicted of peculation. Withdrawal from this odious comedy is now justified by the indignant repulsion of attempts to extort from officers of the army lying denunciations of their former chief. These schemers of witnesses have not hesitated to employ the taxpayers' money to obtain false depositions from jail birds in their cells at Mazas. These are miserable prevaricators who accuse their former ministers of war of corruption. Public disgust has already condemned and the justice of the country will speedily overtake these malefactors. They appealed to the penal code, but the outcome of their infamous machinations was that they could have obtained the most trivial proof they would not thus have risked the assize courts by negotiating with forgers. It is for you, dear fellow countrymen, to judge between us and these thieves. We await with confidence your sentence, from which these bandits, who feel its approach, vainly endeavor to escape. Long live regenerated France! Long live the honest republic!

She Could.

"Can you manage a type writer?" asked one married lady of another.

"Can I manage a type writer? I should say so. I made three leave my husband's office within the last [illegible] and the last is so homely that John is almost afraid of her. The management of a type writer is no art, but I've got it down fine."

A Delightful Resort.

One of the latest summer resorts which has come in favor and which is destined to become one of the most popular in the province, is that kept by Mrs. Deacon at Village Bay, Mayne Island. This pretty spot is situated on the line of the route taken by the steamers running between Vancouver and New Westminster and Victoria, and will therefore always be easily reached by visitors. The accommodation as yet is not intended for a large number, though many have paid Mrs. Deacon a visit this summer, and enjoyed a week or two at this quiet healthy spot. This week the following were stopping there: Rev. Dr. Reid, Miss Reid, T. M. Henderson, wife and family, Mrs. T. Mason and family and Misses Carr, of Victoria; Mrs. Gilmour and Miss Gilmour, Montreal; Rev. Mr. Baldwin, wife and family, Mrs. Dr. Brown, Mrs Strickland, of New Westminster, and Mrs. Geo. Baldwin, Vancouver. The place is picturesque, with pleasant surroundings and good fishing, hunting and good bathing grounds close at hand. The attention given to visitors is most kindly and anyone wishing to spend a week quietly, healthfully and pleasantly are recommended by one who has just returned, to go there. It is believed that this place will yet become one of the greatest of summer resorts.

Making Aluminum.

Fred. J. Seymour, the manager of the American Aluminum Company, is dead and the secret of making aluminum from clay died with him. The process, although patented in nearly all of its points, has been kept a religious secret, and no one has ever been permitted to penetrate the mysteries surrounding it. A fifteen foot picket fence surrounds the buildings, with its gates doubly padlocked. From remarks made by the chemists and other employees at different times, it is gathered that the clay, after being ground in water and treated with various chemicals, is treated to a heat of 1500 degrees in large retorts, until it has become thoroughly fused. When it has reached the crowning temperature the precious metal is separated from the mass by the addition of a certain chemical in specific quantities, but the name and nature of this chemical is not disclosed in the letters patent, nor has anyone employed about the works ever discovered it. It is this secret that has gone down into the grave with F. J. Seymour. It had been his invariable custom to await the critical moment when the fluid mass had reached the right stage, and then all the employees were excluded from the room, the doors were locked, and alone he went through the mysterious processes of the laboratory, adding a chemical that no one knows the name of, has never seen, and in quantities that cannot be guessed at. His death came as the result of a paralytic stroke, from which he never recovered consciousness, so that on his death-bed he had no opportunity of revealing the all important secret. The stockholders of the company are undetermined what to do under the peculiar circumstances in which they are placed, but will probably give some of their chemists full scope to endeavor to rediscover the lost secret.

TO THE TIMES ONLY.

Sentenced to Fourteen Years—A Town Wiped Out by Fire.

A Farmer of Guelph Township Suicides—Fire at Vancouver.

[Special to The Times.]

Calgary, July 23.—Jumbo Fisk, the murderer of the squaw Natalie, was sentenced to fourteen years in the Stony Mountain penitentiary. The judge stated that owing to his friends and relations, but especially his aged mother's pleadings, he would be lenient with him.

ANOTHER TOWN WIPED OUT.

Winnipeg, July 23.—Nearly all the business places in the town of Holland were wiped out by fire yesterday. Bigelow & Co., Pentland & Co., and J. F. Holland are the heaviest losers.

BURKE HAS FRIENDS.

A writ of *habeas corpus* in the Burke case will be applied for to-morrow.

THE OLD GUARDS.

Montreal, July 23.—Officers of the First Connecticut National Guard, the oldest regiment in the United States, have made all arrangements for a visit here in October, permission having been received from Ottawa.

BEATS WIZARD OIL.

Quebec, July 23.—Mrs. Kenny, a cripple for years, was completely cured at the shrine of Ste. Anne de Beaupre on Saturday.

PROMINENT GUELPH MAN SUICIDES.

Guelph, Ont., July 23.—Isaac Dayton, a prominent farmer of Guelph township and a director of the Guelph Fat Stock Club, committed suicide early this morning by hanging himself in a barn. The deceased went to Manitoba in the spring but returned dissatisfied and went back on his old farm. Disappointment in his move to Manitoba and financial difficulties are supposed to be the causes which led to his action.

A SLOOP CAPSIZES.

A Seattle Sloop Overturns off Cowichan Gap—No Lives Lost

[Special to The Times.]

Chemainus, July 23.—W. H. Lomas, Indian Agent, reports that the sloop R & R, hailing from Seattle had capsized off Cowichan Gap. The men are safe but the sloop is still adrift in the gulf. She is a good sized craft and it is expected will be picked up by steamers passing up or down the gulf.

VANCOUVER NEWS.

Cottage Burned—Burglars at Work—The Second Gun.

[Special to The Times.]

Vancouver, July 23.—About 4.30 yesterday morning a cottage near Alexander street, belonging to the Hastings mill, but occupied by Capt. E. C. Bridgman of the tug Mermaid, was burned. The Capt. and his family were away at the time. All the household and personal effects were destroyed. The origin of the fire is a mystery.

Fires are raging in the woods north of the inlet; also beyond False creek.

[illegible] yesterday morning burglars broke into Morris' fruit store on Cordova street. They were observed and escaped.

At 11:26 yesterday forenoon Mayor Oppenheimer successfully fired the second gun of the St. John carnival.

PERSONAL.

Items Telling of Movements of Well Known Persons.

J. C. Blackett left for the West coast this morning on a "still hunt." He goes via Somenos and Cowichan Lake.

Capt. "Jack" Leach, the whilom skipper of the Princess Louise, after an absence of over a year returned from Seattle last evening to remain.

Mr. John S. Bowker returned to Vancouver this morning.

Miss Jennie Anderson returned yesterday from a trip to The Dalles.

Gen. Rufus Ingalls, U. S. A., more celebrated though as a lawyer, was one of the distinguished arrivals in the city yesterday.

Col. Biddulph, Col. H. Cottell, Major Wyllie, officers in Her Majesty's service, on their way to England, arrived on the Olympian last evening.

G. Leiser and M. M. English arrived from New Westminster last evening.

R. C. Hill, of Port Townsend, is spending a few days in Victoria.

Rev. Canon Ellegood, of Montreal, and Rev. D. Jennings arrived in this city on Sunday evening.

His Lordship Bishop Hills, Ven. Archdeacon Scriven, Dr. Bone and several other divines will leave for Alberni on the steamer Maude next Wednesday.

N. B. Crane, general agent of the Masonic Benevolent Association, arrived in this city last evening.

At the provincial lunatic asylum, Toronto, Richard Porter, a patient from Whitby, slew Hector McDonald, a patient from Grey county. Potter is a religious monomaniac and fancies he has a mission to kill two men and commit suicide.

Mr. R. P. Rithet, accompanied by the senior of the firm, Mr. Andrew Welch, will arrive from San Francisco and Portland this evening on the steamer North Pacific.

S. G. Fulton, first assistant general freight agent of the Northern Pacific, is expected to come over to Victoria in a few days.

Col. H. Lovell, England, is registered at the Driard.

MR. DRAKE'S CANDIDATURE FOR THE VACANT JUDGESHIP.

To the Editor of The Times:

Sir,—Most of your readers will admit that Mr. Drake, as senior barrister in the province, is entitled to the vacant chair in the supreme court, supposing that a local man is to be appointed. On the other hand many are of opinion that public interests call for the appointment of a stranger. It is urged that Mr. Drake having a son in his office, who will shortly be admitted, and also a son of Mr. Justice Crease, might feel embarrassed when litigants were represented before him by his son and his brother Judge's son; but this is unlikely to be the case if you look back for twenty years, and recollect that Mr. Drake has been Mr. Justice Crease's trustee, and his firm the legal advisers, both of the Chief Justice, and Mr. Justice Crease, and that no inconvenience has arisen from the situation. In England questions have been asked, notably in Lord Coleridge's case, respecting the propriety of some pleading before their fathers; perhaps these questions may be attributed to the effete prejudices of the old country. Practitioners here, who do not happen to be sons, or sons-in-law of judges, may fancy a happy family arrangement to be prejudicial to their interests, but they will surely take the same view of such affairs.

SENILE DECAY.

Since the Columbian has taken the trouble to quote so much of our editorial on the evidence of "senile decay" on the part of the government, why did it not continue, and tell us of the mighty efforts of the government to preserve wagon roads from mud holes by compelling the farming community to use four inch wagon tires. We might enumerate other legislative puerilities for which the government is responsible, but it is not worth while; the country knows all about them. We would remind the Columbian, however, that all of the useful legislation last winter came from the opposition. If one single act last winter emanated from the government of unqualified public utility will the Columbian please point it out. Men are judged by their actions, and not by the rawp of their newspaper supports. We will say for the benefit of the Columbian that if the government continues to hold the fort it will have the liveliest time vindicating itself that it ever had.

KOOTENAY OUTLET.

Somebody writes to the Colonist that there is a cry going up for a wagon road between Nelson and Sproat's Landing, and that parties from Spokane are willing to build it and wait for their pay until the government makes an appropriation. We call the attention of the News to the Colonist's correspondent, and respectfully suggest that it call the attention of the government to the offer of the Spokane people. The News' method of "sapping a solemn creed with a solemn sneer" is good enough for us. It has the faculty of penning diatribes which the government can read without calling for smelling salts. The News, therefore, will kindly point out to the government that the people of Kootenay can have an outlet to the Columbia river if the government will only sanction the enterprise, and guarantee a reasonable compensation for the time and labor expended.

THE UNTUTORED INDIAN.

The condition of some of the tribes of coast Indians, as portrayed by Mr. H. R. A. Pocock, forces us to conclude that either the Indian Department has been remiss, or that efficient as the department may be, its wards possess the fatal faculty of contracting vices faster than virtues. On the whole, we are inclined to attribute the degradation of the Indian to his own intrinsic weaknesses, for, however derelict the Indian Department may have been in respect to tribes, its general policy is broad and liberal. The Indian agents without exception are intelligent men, profoundly interested in the functions they are required to fulfill. We have no hesitation in saying that a people too vicious to profit by the paternal interest manifested by their guardians, the agents, and too graceless to heed the salutary ministrations of their spiritual advisers, may be regarded irredeemable in so far as any ordinary effort towards their redemption is concerned. We are not to suppose that the redemption of the Indian may be composed by the exercise of surveillance in conjunction with the moral regimen to which he is now subjected, nor may we readily believe that isolation from the white man will materially assist him to reach a higher moral and mental plane. The Indian must be made to accustom himself to his environment, and if between the sound advice of which he is the recipient from both church and state, he cannot manage to steer clear of pitfalls, upon whom does the responsibility of his deterioration lie? The fact of the matter is the Indian is deficient of the mental and moral stamina to enable him to assimilate and extract advantage from the conditions of his environment. When we remember that the pitch of civilization at which we have arrived is the result of consecutive effort for the last 2000 years, how should it be possible for the untutored savage in the comparatively short space of less than two centuries to raise himself to the moral and mental plane inseparable from the repudiation of our vices and the acceptance of our virtues? Still while we feel assured that the annihilation of the Indian will be owing to his inherent defects, we cannot escape the thought that the government has too often left him a prey to unscrupulous men. The law, indeed, has provided a penalty for the debauching of the Indians by the sale of intoxicants, but it has not provided the means of bringing delinquents to justice. Herein lies the fault, and if Mr. Pocock's exposures shall serve to stimulate the Indian department to take more effective measures for the protection of its wards he may flatter himself of having accomplished a most desirable end. Though the Indian lags superfluous on the scene, common humanity demands that he should be protected against the rapacity of men who represent our worst vices and none of our virtues.

CREMATION.

The great plea for cremation is the sanitary purpose it is supposed to conserve, and really taking into consideration the importance of drainage and the non-exhalations of decomposing matter, there is no reason why cremation should not come into general practice. Indeed, we cannot understand the prejudice against it. The dead, within a comparatively short period after interment, mingle with the dust which surrounds them. They decay, and are known no longer except as a constituent feature of mother earth. Knowing this to be the case, in what respect is cremation objectionable, and in fact is it not the better method of attaining that grand ultimate, "dust to dust?" Besides, cremation is cheaper than the present method of "planting" our deceased friends. It saves expensive investments in grave-yard real estate, mausoleums, monuments, tombstones, embalming and coffins. All that is required is a little vase for the repository of the residue of the deceased. But not alone is the cremation of human bodies desirable. The refuse matter of cities should be destroyed by fire as far as practicable. In rural districts this method of getting rid of polution is not so necessary. The free winds of heaven there have full play and noxious vapors are soon dispersed. But cremation, like other reforms requires time and patience. That it will ultimately come about there is no question. There certainly can be no moral objections against it, and the fact that churches and governments have withdrawn their veto from it should encourage its coming into general practice.

DOWERING THE PRINCES.

Since Gladstone is delighted at the moderation of the Queen's demands for money grants to her grandchildren, the Liberals should gracefully acquiesce to the opinion of their leader, aye, and for that matter, Mr. Labouchere also. But Mr. Labouchere is obdurate. He can see no sense in subsidizing these royal grandchildren, particularly since the Princess Louise is to marry an English nobleman worth $400,000 a year. The Queen is reputed to be worth $20,000,000 herself. What is she going to do with such a vast accumulation of money? Why should she hoard up this vast sum while she has so many needy grandchildren? We have the utmost respect for the Queen. She is a woman of many virtues, but how she can ask the people of England to put up for these princelings passes our comprehension. Possibly she feels that England is rich and can stand it. It is not unlikely, however, that Her Majesty is strongly prepossessed of the idea of the divine right of kings, and therefore, regards England as morally bound to "put up" for her somewhat numerous descendants. On the other hand it is said that the Queen hasn't a dollar, and in proof of it she will submit her accounts for public inspection. It need scarcely be pointed out, says "Member of Parliament," a correspondent of the Mail, that the effect of these disclosures must be to the discredit of the Radicals. But whether the Queen has saved any money or not, it is a question of whether the country should put up the enormous sums asked for these princelings. It is all very fine this keeping up of the dignity of the royal family, but the obligations are not all on one side. The Plantaganets as a rule earned every dollar of their salary, the Guelphs, we should suppose, might do something for their country themselves.

EDITORIAL NOTES

Mr. Norquay died a poor man. Our politicians as a rule make nothing out of politics. Yet the money undoubtedly goes. There can be no doubt that where money is made it is made by the man behind the scenes, the person who secures a contrats, contributes slightly to election funds, and pulls a few wires.

The Aerial Exhibition Association has been organized with C. M. Ransom, of Modern Light and Heat, as treasurer; H. N. Bowley, chairman, and Chas. B. Basford, chairman of the board of trustees. The object of the association is to assist Dr. A. De Bausset to construct a steel air ship upon the vacuum principle. The ship is expected to carry two hundred passengers and fifty tons of mail or freight, and to reach a speed of seventy miles an hour. It will cost $250,000, and a national subscription is being made to provide funds. Permission has been asked to build the ship at Charlestown navy yard.

Mr. Abbott is going to Australia as a commissioner to talk with the business men there on the subject of trade with Canada. No better man could be sent on this difficult mission. But it would be folly to be too certain that even Mr. Abbott can establish a large trade between the two countries, though everybody must hope that he will smooth the way for something better in the shape of business than we have now. Our exports to the Antipodes are chiefly in agricultural implements. Anything that can be done to facilitate that business will be welcome. Mr. Abbott's mission is evidently the reply to the Australians who, when invited to come to Ottawa and discuss the commercial question, responded that they had really nothing to say on the topic.

Mr. Joseph Pulitzer, a Hungarian Hebraic American, who for a few years since purchased the New York World, and has made of it a gigantic success, pines for fresh fields of conquests. He has accordingly it seems, made arrangements, now nearly perfected, to publish in London a new morning paper, conducted according to a combination of American and English ideas. The principal departments of his journal will be under the direction of persons trained in New York and St. Louis to carry out Mr. Pulitzer's system; but their working staff will be recruited among London journalists. Some of the best leader-writers and reporters have already been retained, at liberal salaries, although they are yet pledged to secrecy. The plan of the new paper, which will be called the Daily World, if no legal difficulties prevent, is to take the English pattern and improve upon it by adding American ways and means. Mr. Pulitzer's paper will be the size of the London Times, and quite as handsomely printed, but it will be illustrated like its New York model, and will publish displayed advertisments. It will have the long scholary essays termed leaders, which are peculiar to English journalism, but it will give more American news by cable than all the other English papers combined.

—Patti says plenty of sleep is the secret of preserving one's beauty. The nightwatchman believes this.

—There is comfort in store for persons troubled with lame back, rheumatic pains, corns or bunions, who commence without delay, a course of *Dr. Thomas' Eclectric Oil*, followed up systematically until relief is obtained.

—What purports to be the milk of human kindness frequently turns out to be merely chalk-and-water imitation.

—*F. Burrows*, of Wilkesport, writes that he was cured of a very dangerous case of inflammation of the lungs, solely by the use of five bottles of *Dr. Thomas' Eclectric Oil*. Feels great pleasure in recommending it to the public, as he had proved it (for many of the diseases it mentions to cure) through his friends, and in nearly every instance it was effectual.

—Law is like a sieve. You may see through it, but you must be considerably reduced before you can get through it.

—The Laws of the Medes and Persians were not more immutable than those of nature. If we transgress them we suffer. Sometimes, however, we break them inadvertently. Damages frequently take the form of Dyspepsia, Constipation and Biliousness, which can be easily repaired with Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure, the Great Blood Purifier and renovator of the system.

—A lady from Syracuse writes: "For about seven years before taking Northrop & Lyman's Vegetable Discovery and Dyspepsia Cure, I suffered from a complaint very prevalent with our sex. I was unable to walk any distance or stand on my feet for more than a few minutes at a time without feeling exhausted, but now I am thankful to say, I can walk two miles without feeling the least inconvenience." For Female Complaints it has no equal.

—In a restaurant, a gentleman complaining that his steak is tough. The head waiter demanded: "Garcon, give the gentleman a sharper knife."

—There are few disappointments in life equal to that experienced by a man who expects that he is going to sneeze, and suddenly discover that he can't.

The Power that Moves the World

FIRST ANNUAL TOUR
—OF—
D. McLENNAN
—OF—
SAN FRANCISCO, CAL.

THIS WONDERFUL MASTER OF THE Healing Art has arrived in the city, where he intends to remain for a short time, to cure the sick and afflicted of this vicinity. He comes to us laden with testimonials from the leading citizens of California and the South. In San Francisco he has practiced for the past sixteen years, and the authenticated reports of some of his cures seem nothing short of miraculous. He uses no medicine and perfects his cures mostly by the WONDERFUL POWER OF MAGNETISM, the gift of but few men on earth. This is the only method of treatment that restores the life-giving principle, magnetism, to the system, thereby increasing the vital powers and electrifying the nervous system, sending the blood coursing and bounding through the veins, withdrawing and allaying in a few minutes all pains and aches from whatever source.

The diseases which yield most readily to the curative agency of this method, as practiced by McLennan, are: Asthma, Bronchitis, Consumption, Deafness, Eruptions, Gravel, Paralysis, Loss of Voice, Wakefulness, Diarrhœa, Dropsy, Fits, Piles, Scrofula, Swellings, Weak Spinal Complaints, Cold Feet and Hands, Biliousness, Contracted Limbs, Diseased Kidneys, Erysipelas, Nervous Prostration, St. Vitus's Dance, Weak and Failing Limbs, Mental Depressions, Diseases of the Brain, Dyspepsia, Diabetes, Stricture, Impotency, Tape Worm, Carbuncles, Costiveness, Palpitation of the Heart, Liver Complaint, seminal Weakness, Falling of the Womb, Catarrh, Heart Disease, Fever Sores, Lameness, Rheumatism, Swollen Joints, Weak Lungs, Gout, Goitre, Coughs, Diseases of the Eyes, Neuralgia, Tumors, Tetters, Cancers, White Swellings, Leucorrhœa, Ague and Fever, Milk Leg, etc.

No Medicine Given!
No Surgical Operation!
No Pain Whatever!

THE JESUITS' BILL.

To the Editor of The Times:

Sir,—Will you allow me to say a few words on this bill in answer to the Rev. P. McF. Macleod's letter. To begin with, I have no power over the pen of "Spectator," therefore I cannot withdraw that writer from the discussion. Mr. Macleod finds I have not stated one fact in what I said of certain funds being held in trust for the Jesuits, etc., and to this I have only to say, I could not in so few words describe the situation more accurately. I cannot go in full into the history of this bill. To do so I must take up all your space for about a week, and, however much I might be gratified, I am afraid your subscribers would object. I will state the case shortly. It is granted on all sides of the House, save by one or two fanatics whose tone betrays them, that the Jesuits or their successors have a moral claim to certain properties in the Province of Quebec. The government have attempted to sell these properties, but they have been met by injunctions from Catholic authorities claiming that they were the successors of the Jesuits in that province, and that therefore they were entitled to those properties, and that no true title could be given without their being parties to the sale. In this position buyers would not complete, a fact speaking volumes for their solicitor's opinion of the legality of these claims. What were the government to do, to look up the properties for ever, or to try to come to an agreement with the parties concerned, and thus have done with a source of perpetual annoyance? They took the latter course and then the question occurred to the government, who could apportion the money, and they hit on the idea that the Pope would be the best arbitrator to appoint. They then said to the Catholics in Canada, agree among yourselves to abide by the award of the Pope and we will pay over the money, but on this condition, that before we pay over a dollar, all parties claiming to be interested in these properties, including the Pope, must first absolve the government from any further claim. This the Orangemen say is submitting to the dictation of the Pope. I maintain it is dictating to the Pope, rather, what he is to do. This is a plain unvarnished statement of what has been done, and to my mind a man must look through Orange spectacles to find fault with it. I am not going into the other question of maintaining the religious liberty for which our forefathers shed their blood, except by saying that the oppression of the Catholic church in England and in Ireland by a half Protestant and rival church has made the cause of the Catholic ict, since the reformation, to be synonymous with the cause of religious liberty; and but for the arrogance of that rival church and the fanaticism of the Orange party we should never have had the Irish question to deal with; that we have had to be ashamed to see justice done to our fellow subjects in Ireland, without the aid of the Evangelical Party and in spite of the Bray of Exeter Hall, and not once or twice a section of the Scotch church acting so as to justify Mill on's famous dictum "Presbyter is Priest writ large."

James Angus.

A CONFAB ON TAXATION.

To the Editor of the Times:

Sir,—June is the month, if at no other time of the year, we are pretty sure to meet each one his neighbor, as this is the time of our annual pilgrimage to the government buildings. Not that we object in the least that everything is transacted on the same economical basis As I was trudging along in that direction, I met Jack with an expression on his features anything but pleasant. I thought he had tumbled over the bridge or something worse. I asked him what was wrong.

"Why," says he, "the government has about doubled my taxes the last two years. Can you tell me what they have done it for?"

Yes, Jack, I suppose they can't govern you and me without money.

Money! Why?

Oh, Jack, don't speak quite so loud. The government will hear us and I am a government man, and besides we have to be careful how we talk. There is nothing to prevent them doubling the taxes on us again next year. Haven't you a Lands and Works account, Jack?

No, I am in the opposition and don't even see anything of the kind. Well, if you did you would not ask me any such foolish questions. But as you are a little excited, Jack, we had better defer this matter until you are in a less quarrelsome mood.

Jack was no sooner out of sight then I met Dick, and he asked me the same question; but I could see the latter was of a more philosophical turn of mind and of cooler temperament than Jack. He asked me, thinking I ought to know, why the taxes were raised so much and in so short a time, and did I think they were going to follow this thing up.

I am afraid so, Dick, I replied, as salaries and other expenditures are being carried out on a very lavish scale, and everything is tending upwards as becomes the dignity of this country, you know, and besides most of the real estate is in the country and that is always a standby with all governments. But you have nothing to complain of in the shape of taxes, have you? Hon. John Robson told us a session or two ago that our taxes did not amount to a row of beans, only some $2.40, or $2.60 per head. Why, in New Zealand they are taxed, I believe he told us, by the way of comparison, $18 per head.

Two dollars and forty cents be hanged. Keep cool now Dick.

I don't care, John Robson may say what he likes. I have been figuring up and I pay about $300 in a year.

How do you make that out, Dick?

Well, I have a large family and consume a great deal of stuff, and I pay it to the customs.

Oh, that is not a fair argument, Dick. The customs don't belong to us. All that goes to Canada, do you see, Richard.

No, I don't see. I am in favor of the tariff and don't object to paying this sum, but don't want to be told my taxes don't amount to a row of beans. It comes to near $40 a head for my family. Now if that's not taxes, what do you call it?

Well, you puzzle me a little, Dick, but John Robson ought to know best and he always tells the whole truth, and if he was not telling the whole truth your mouth pieces were there when he brought those statistics up and they did not say anything, but agreed with it. And Anderson rather favored it, as he since told us we must expect to be taxed. Your suggestion is good, Dick, if it could be brought about, to let the government count two votes for Victoria district. It would save the country $800 a year besides refreshments. It's a misnomer terming Tolmie and Anderson Saanich members. They should be called government members. Oh yes, Dick, they could say something if they were inclined that way. The governing party is very sensitive, and those men don't like to hurt their feelings. They say Tolmie had a brilliant speech to deliver when he seconded the Governor's address, but I was told he had been in the refreshment room, and like some of the pugilists overstrained himself. When he came to the scratch he was that far gone he just whimpered, but the other members gave him great encouragement for his noble effort. They went their pile on the effort. No, Dick, I know everything is not going up. Laborers wages are down, farm produce is down, and some of it we can't sell at all. Provisions are cheap and salaries and all other expenditures should be governed more or less by this.

Well, I've been told by a responsible party that dozens of farmers had to borrow money to pay their taxes this year. I know, Dick, being in opposition you can't get a blue book. Although a government man they never send me one either. I suppose I am too inquisitive and meddlesome. You remember the father's advice to his son, Dick, get money honestly, but get it anyway. I have the blue book; don't ask me how there books are often sent to men who don't read and to some others who are mixed up with the accounts in a practical way.

Well, one more question; did you see what the road boss got a month?

Yes sir.

Well, what's the qualification for that job?

Well, he must be able to plow and harrow, spend the money that's appropriated for the district to his own wisdom—he needn't put it on the roads. He has to be a bit of a mind-reader, and to know beforehand whether you intend voting for the government and himself. No vote, no work. Last year he discharged several because they did not tell him who they voted for, and said they did not deserve anything. He has in addition to possess a strong constitution. So much knocking around. And finally I suppose you have read of the kangaroo with its grip sack, where it carries its young. Well, that's a part of the money qualifications—a grip sack with a few votes in it. Good bye, Dick, if I fail to meet you at the appointed time, I will send you a few items any way, and you can distribute them.

THE KINGSTON LETTER CASE.

A Sealed Letter from Sir John Macdonald Opened.

Kingston, July 19.—Further particulars have been learned regarding the two clerks in the postoffice who were suspended on the charge of opening letters. It is stated that about two months ago one of the clerks read the contents of an unsealed drop letter sent to a merchant by a girl asking him for money. The other clerks, however, who have not yet been suspended, were parties to this affair. The other clerk suspended is charged with opening a sealed letter sent to a gentleman by Sir John Macdonald. The contents of the document bore upon the business of the postoffice and treated of the appointment of a deputy postmaster. The suspended clerks say that an employee of the office told the inspector of the office that the letters had been read to avenge the informant's spiteful feelings. The matter has been referred to the postmaster-general for adjudication.

The Great Water Case.

T. C. Clarke, one of the parties to the great Pavilion Mountain water suit, which was decided in favor of Carson, the plaintiff, by the Supreme Court of Canada, after five years of litigation, writes to say that the case will be appealed to the Privy Council. The judgment of Mr. Justice Strong, of the Supreme Court, is one of the longest ever delivered in Canada, and is said to be a masterly presentation of the facts and the law on the questions in dispute.

Lake Abbitibi.

Frank Bignall, a well-known pioneer, has arrived at Quebec from Lake Abbitibi. He speaks exultingly of the beauty and richness of that region, which he reports as being of plain, untroken stretches of land. Pine attain colossal proportions and the soil is the richest in the Dominion in mineral deposits. He describes the climate as being milder than Lake Temiscamingue. Lake Abbitibi has recently been acknowledged as forming the integral part of the province of Quebec. The nucleus of a colony of agriculturists is already settled there.

Wilkie Collin's Wondrous Talent.

Dining one evening with Wilkie Collins, he spoke of the difficulty of imagining a place or character which had not its original in real life. After he had described the house in "Armadale" a gentleman called upon him and upbraided him for putting his residence into print. The description was exact, although Wilkie Collins had never seen the place. He invented a man who was so careful about his food that he weighed it in little scales at table. A gentleman was introduced to Mr. Collins and said: "You had no right, sir, to caricature me. I weigh my food in little scales, sir! Here they are, sir! I always carry them about with me by advice of my physicians. But is that any reason why I should be held up to ridicule, sir?" In vain Mr. Collins protested that he had never before heard of such a habit.

Mr. Pridham of Australia.

Mr. Charles A. Pridham, of Melbourne, Australia, formerly crown prosecutor for the colony of Victoria will arrive here in a few days, accompanied by Mr. T. Murphy, a young man entrusted to his guardianship. Mr. Pridham was special commissioner on the European continent for the London *Times* in 1848-49 and 70, and as such acquired a reputation as a journalist. He also engaged in newspaper work for some time in Australia, before entering actively upon the practice of his profession. Mr. Pridham retired from official duty some years ago, and is now taking a trip around the world. He left Melbourne with his ward fifteen months ago, and after spending some time in the neighboring Australian colonies, went to England by way of the Suez canal. After "doing" England, Ireland, Scotland and France, the two gentlemen proceeded to New York, and from thence to Montreal and Ottawa. They then went to Toronto and Niagara, and thence over the C. P. R. to British Columbia, and purpose sailing from San Francisco on the 29th of the month. Mr. Pridham desires to contradict the statement made by a Montreal paper that he is specially commissioned by the Australian government to report upon the practicability of the Canadian Pacific as a route for the mails between Great Britain and Australia, but says that he has been informally requested by several of the colonial governments to give his views as to the character of the Canadian Pacific route, on reaching home.

Kate Field, who has been engaged for several months in lecturing for and advocating California wines in the east, has quarrelled with her viticultural friends on the Pacific slope and has thrown up her commission. Miss Field claims that she favors California wines in the interest of temperance. This is a funny idea. There is more headache and alcoholic deliriry in a bottle of California claret than there is in a pint of old Medford rum. The French bleeders can make a gallon of nice Bordeaux wine out of a quart of California red wine. How will the cause of temperance be advanced by substituting this heady product for the light stimulants now in vogue?

Chauncey Depew recently told a good one on himself. "When I was traveling to New Haven on an accommodation," said he, "I thought that the whole state of Connecticut had its attention fixed on the fact that I was to make a speech to the law school graduates at Yale. When a farmer got on at a way station and, after looking at me five minutes, asked me if I was not Chauncey Depew, I said to myself: 'Here is an intelligent son of an intelligent state. He is going on to hear my speech.' He confirmed my impression by asking: 'Are you going up to New Haven?' but when I answered 'Yes' he simply said: 'Baseball game, I suppose?'"

The Canadian Pacific Land and Mortgage Company, Limited, (Foreign).

Registered the 10th day of July, 1889.

CERTIFICATE OF REGISTRATION.

THIS IS TO CERTIFY THAT I HAVE THIS day registered "The Canadian Pacific Land and Mortgage Company, Limited, (Foreign)" under the "Companies Act," Part IV, Registration of Foreign Companies.

The objects for which the Company is established are:

1. To purchase, take under any concession, lease, or in exchange, hire or otherwise acquire, settle, improve, farm and cultivate lands of any tenure, franchises and hereditaments situate in the Dominion of Canada, the United States of North America, or elsewhere, including any mines, minerals, ships, steamboats, barges, and other vessels, engines, railway wagons, tanks, reservoirs, manufacturing plant, apparatus and stock in trade, and any other real and personal property of whatever description, whether the same be unencumbered or subject to any mortgage, charge, lien, easements, privileges, licenses, concessions or otherwise, and to develop the resources of any such properties by building any kind of structure thereupon, planting, reclaiming, clearing, mining, quarrying, excavating, damming, draining, farming, and otherwise dealing with and working the same, and to stock lands and farms, and to breed, grow and deal in all kinds of stock, cattle, horses, sheep and produce, and to erect and maintain thereon suitable buildings and structures, including slaughtering, refrigerating, and converting establishments.

2. To invest money by way of advance, or loan at interest to any person or persons, or corporation, upon the security of any property and securities whatever, real or personal, including produce, crops and manufactures, government and all other stocks, bonds, mortgages, or securities, whether British, colonial, or foreign, and generally to buy, manufacture, deal in and sell all kinds of goods, chattels, merchandise, produce and effects.

3. To aid, encourage and promote immigration, emigration and colonization, and for such purposes to lend and grant any sums of money, and to act as agents therefor.

4. To work, win, convert, sell, use or otherwise deal with all or any mineral property of the Company, to construct or acquire, take concessions of purchase or lease, hire, maintain, improve, work and use, or aid in, or sell, scrip towards the construction, maintenance, improvement and working of roads, ways, streets, tramways, wire tramways, electric or other power, telegraph and telephone lines and works, or other means of communication or appliances of a similar nature, railways, rail way stock, locomotives, engines, docks, piers, harbors, quays, wharves, landing stages, jetties, slips, stores, bridges, canals, channels, wells, buoys, lights and beacons, viaducts, aqueducts, water works, flumes, culverts, ditches, warehouses, factories, shops, churches, chapels, schools, libraries, institutes, inns, foundries, brick kilns, reduction works, gas and water works, electric lighting or power works, hotels, mills, undertakings, works, and other buildings and structures, of every description, and for the above purposes to enter into and carry into effect any contracts, and apply for, accept, and carry into effect such concessions, licenses or authorities as may be deemed necessary or advisable.

5. To acquire running powers, rights or easements over and to make arrangements with any companies or persons for the joint working of any railway, tramway, or line of electric wire, or other similar means of communication.

6. To build, purchase, charter, hire or otherwise acquire, maintain, repair and use steam and other ships and vessels, and to carry on the business of ship owners, lightermen, wharfingers, dock owners, warehousemen, ship chandlers, commission and shipping agents, and to levy cranage, anchorage, lighterage and other dues and tolls, either in connection with the other businesses of the Company, or as an independent source of profit.

7. To transact all manner of agency and commission business, and in particular to act as agents for any persons or corporation in the purchase, sale, or management in any way of lands, hereditaments and other property in the Dominion of Canada, the United States of North America, or elsewhere, where the Company may for the time then being be carrying on business, and to carry on the business of general, commercial, mercantile, shipping or forwarding agents, or agents for any railway, steamship, or other company.

8. To accept and hold any property whatsoever upon any trust whatever, and to make advances against the same, and to issue debentures there against, and to act as trustees, attorneys or agents of or for any persons, living or dead, or of any company, corporation, public body or supreme government, and also as real or personal representatives of any deceased persons.

9. To transact all business connected with the investment and loan of money at interest, to receive money on deposit, and generally to transact and carry on every description of banking, discount, exchange and financial business.

10. To make, draw, accept, indorse, discount and execute promissory notes, bills of exchange, and other negotiable instruments.

11. To build, lay out, and plant colonies and develop towns and villages on the lands acquired or controlled by the Company from time to time.

12. To purchase or otherwise acquire the exclusive or limited right to use information as regards any inventions, whether patented or not, which may seem capable of being used for any purposes of the Company, or the acquisition of which may seem calculated, directly or indirectly, to benefit the Company, and to acquire any grants, charters, concessions, patents, patent rights, monopolies, brevets d'inventions, copyrights or licenses, and to use, exercise, develop, grant licenses in respect of, or otherwise turn to account the property, rights and information acquired.

13. To take or otherwise acquire, and hold or sell shares, stock, debentures, or any other interest in any other company, whether British or foreign, in which the liability of the members is limited, having objects altogether or in part similar to those of this Company, or carrying on any business capable of being conducted so as directly or indirectly to benefit this Company.

14. To purchase or otherwise acquire or undertake all or any part of the business, property and liabilities of any company, corporation, society, partnership or person carrying on, or about to carry on, any business which this Company is authorized to carry on, or which is in any respect similar to the business for the time being of this Company, or which is capable of being conducted so as directly or indirectly to benefit this Company, and to make and carry into effect arrangements with respect to the sharing of profits, union of interests or amalgamation, either in whole or in part, of this Company with any such company, corporation, society, partnership or persons.

15. To dispose of by sale, lease, underlease, exchange, surrender, mortgage or otherwise absolutely, conditionally, or for any limited interest, all or any part of the undertaking, property, rights or privileges of the Company as a going concern or otherwise, to any public body, company, society or association, or to any person or persons, and in particular to any other company having objects altogether or in part similar to those of this Company, and to accept as the consideration, or part of the consideration for such disposal money, stock shares, debentures or other securities, either for distribution in specie among the members or otherwise.

16. To subscribe for, take, acquire, hold and sell the stock, shares, scrip, certificates, bonds, obligations, debentures and securities of any other company, or of any supreme, municipal, public or local board or authority.

17. To borrow and raise money for the purposes of the Company in such manner and upon such terms as the Company shall think fit, and to secure the repayment thereof by bonds or debentures, or by redeemable or unredeemable debenture stock (such bonds, debentures and debenture stock being made payable to bearer or otherwise) or by any other instruments, or by bills of exchange, or promissory notes, or in such other manner, as may be determined, and for any such purposes to charge all or any part of the property of the Company (both present and future), including the uncalled capital.

18. To obtain any provisional order or Act of Parliament or legislative provision, decree or order of any colony, foreign government, ruler or authority, to incorporate the members or a body politic or corporate, in accordance with the laws and constitution of any country or state in which the Company shall be carrying on, or be desirous of carrying on, any of its operations, and to take all steps and do all things necessary to give the Company, or any company subsidiary thereto, a legal domicile in any such country or state, and such legislative powers as will facilitate the carrying into effect of the objects of the Company therein.

19. To give any guarantee of whatever description in relation to the stock, shares, debentures or other securities or obligations of any company or corporate, public, municipal or local body or authority, and generally to guarantee the performance of any covenant or obligation.

20. To transact all business connected with the investment and loan of money at interest.

21. To allot the shares of the Company credited as fully or partly paid up as the whole or part of the purchase price for any property purchased by the Company, or for any valuable consideration.

22. To appropriate and apply such parts of the capital of the Company as may be expedient to the payment of such brokerage, discounts and other expenses as may be deemed incidental to the formation and promotion of the Company, and the placing of its shares and debentures, or any part thereof.

23. To aid any government or state, or any municipal, local or other body politic or corporate, or company or association, or individuals with capital, credit, means or resources, for the prosecution of any works, undertakings, projects or enterprises.

24. To do all or any of the above things in any part of the world, and either alone or in partnership or conjunction with any person or other association, and either as principals or agents, and to contract for the carrying on of any operation connected with the Company's business by any person or other association.

25. To carry out the objects comprised in each paragraph of this clause in as full and ample a manner, and construed in as wide a sense as they would be construed if each paragraph of this clause defined the objects of a separate, distinct and independent company, and so that such objects shall not, except where otherwise expressed in such paragraph, be restricted by reference to the objects indicated in any other paragraph.

26. To do all such other things as are incidental or conducive to the attainment of the above objects, or any of them, or which the Company shall consider incidental or conducive to the attainment of the above objects, or any of them, and so that the word "company" in this memorandum shall be deemed to include any partnership or other body of persons, whether corporate or incorporate, and wherever domiciled.

The amount of capital stock of the said Company is £250,000, divided into 25,000 shares of £10 each.

The place of business of the said Company is located at the City of Victoria, in the Province of British Columbia.

In testimony whereof I have hereto set my hand and affixed my seal of office this 10th day of July, 1889, at the City of Victoria, in the Province of British Columbia.

[L.S.] C. J. LEGGATT,
jy19 Registrar of Joint Stock Companies.

For the South.

The Mexico sailed for San Francisco this afternoon with the following passengers from this port: H. Bruce, D. N. McMillan, Geo. Powell, C. E. Guinand and wife, Miss M. Van Allman, F. R. Murray, Jas. Vaughan, G. A. Walton & wife, Mrs. W. L. LeBallister and Mrs. Thos. Hirst and child.

A Queer Householder.

A colored man resides beneath the top of a carriage behind Mr. Meston's shop on Government street. The brush in the locality is very dry and a fire is burning near the man's abode. The fire department and insurance agents are complaining about the danger to the locality through allowing the man to reside there.

Sad Death.

Mrs. James Blair, residing near Ross Bay cemetery, died suddenly in an epileptic fit on Monday morning. The deceased was only 35 years of age and had resided here but a brief period. A loving husband and two boys are left to mourn her untimely death. The funeral will take place to-morrow afternoon.

Are you Registered?

The qualification for provincial electors is citizenship and a year's residence. Every male person over 21 years of age, who is a British subject and has resided in the province one year—the last two months in the district where he registers—is entitled to a vote. At almost every election there are a number of persons who complain that they are not on the list. There is really no excuse for any person having the qualifications not having a vote.

Dry Dock Notes.

The steamer Premier, after being three days in the dry dock, will come out in the morning, when the Islander will immediately enter. The Premier has had her bottom scraped and given two coats of paint. The first coat was allowed to dry before applying a second, which accounts for the lengthy stay of the vessel in the dock.

A slight mishap occurred to one of the pumps on Sunday which caused a delay of four hours in pumping out the dock.

The Pacific Fleet.

The Champion leaves Esquimalt on Monday with the mails, etc., and will join the Pacific fleet in the north, returning about the 10th prox. with Admiral Hemeage and the Swiftsure, Amphion, and Icarus.

The Acorn, eight guns, a screw sloop of 970 tons, and 1380 horse power, is expected to arrive shortly at Esquimalt from the west coast of Africa. Her commander is Wm. R. B. Atkinson and her lieutenant Francis A. Valentine.

Shortly after the fleet returns to Esquimalt, Admiral Hemeage will take it to sunnier regions in the South, down towards Valparaiso.

The last that was heard of the fleet was from Fort Simpson, when all were well.

Children Cry for Pitcher's Castoria.

Death at Tacoma.

George H. Warner, the 18-year-old son of Henry H. Warner, formerly of this city, died at Tacoma on Saturday last. The funeral took place on Monday afternoon.

Meeting of Contractors.

The contractors of this city held a meeting last evening in the Occidental building, corner of Fort and Government street. The regular business was attended to and it was decided to hold the election of officers on Monday evening next.

Schiedmayer & Soehne Pianos.

We have just received a consignment of the above pianos direct from the factory. These are the best instruments made in Germany, and are without doubt the best German pianos ever imported into this country. M. W. Waitt & Co.

Building Society Meeting.

A general meeting of the Victoria Building Society will be held at Harmony hall on Wednesday evening to receive the report of the directors. The seventh drawing for an appropriation will be held at the conclusion of the meeting.

Marriage Assured.

The public marriage at the Foresters' picnic will not be devoid of interest. Already one couple have signified their intention of being joined in wedlock at 3:30 on the fateful afternoon of Aug. 3rd, and two other couples are contemplating the same thing. These events are always interesting, but when tinged with romance are doubly so.

Loss of a Horse.

A valuable horse, considered to be worth $250, owned by Van Volkenburgh Bros., died in their new stables, Yates street, on Sunday morning from an unknown cause. The animal had been running out to pasture for the past two months and was lately taken sick. It was brought in town for treatment without success. It is supposed it had been eating of poisonous weeds, which caused sickness and ultimately death.

The Vice-Regal Visit.

The Governor-General's party which will visit British Columbia in September, will be composed of Lord and Lady Stanley, Capt. and Mrs. Col Ville, Hon. Victor Stanley, Miss Isabel Stanley, Miss Lister, Sir John Ross, Major Mascell, A. D. C., and wife. The whole party will start on the official visit to the west on the 14th of September, returning and taking up their residence in Ottawa at the end of October.

Plenty of Anthracite Coal.

Mr. J. L. Mudge, manager of the Anthracite mines states that the output of the mines at Anthracite is steadily increasing, and it is expected that ere long the amount of coal turned out of the shafts daily will total up at least 1,000 tons. It is true that an English syndicate has bought an interest in the mines. Many of the seams are from 13 to 25 feet in width, and there is enough already located to last for probably 100 years.

Serious Accident.

John Binns, car inspector on the E. & N. Railway, met with a very serious accident on Sunday afternoon at 3 o'clock. He was coupling two engines at Russell's station when they came together unexpectedly, driving one of the links through his left hand, crushing the bones and lacerating the flesh in a terrible manner. A physician was telephoned for and was in a tendance shortly after the accident occurred. It will, most likely, be necessary to amputate the injured hand.

Lord Fife's Sisters.

Lord Fife, who is about to marry Princess Louise of Wales, is in the unusual position of having two sisters who have been divorced. There is his mother's sister who was married to Lord Dufferin. She was divorced thirteen years ago, and has since married twice. The other sister was known before her divorce as Mrs. Adrian Hope. She also has re-married. One of these ladies was well known in Victoria society, for she lived some time, under another name, in the old Colonial Hotel on Government street.

Takes the Cake.

The Albion Iron Works is at present constructing a mammoth smokestack for the Chemainus sawmill. It is 93 feet in height and 6 feet in diameter, of sheet iron one-sixth of an inch in thickness, and an ordinary sized man can walk through it without stooping in the least, except he has on a "ping" hat. It is by far the largest of its kind that has ever been constructed and will be shipped to its destination in three separate parts. Its particular use is to carry off the smoke from the furnaces of six boilers.

The Comedy Company.

The Philharmonic was literally jammed last night with an appreciative audience to witness the "Diamond Mystery" as produced by the Chicago Comedy Co. The play was well put on and conscientiously acted. As a comedian Mr. Devlin was quite a pleasant surprise and kept the audience in an hilarious mood the entire evening. Miss Belle Isman shared the honors of the evening with Mr. Devlin, and is an actress of merit. The minor parts were well taken and we believe the audience was thoroughly satisfied when the curtain was rung down. A feature of the evening was the piano solos of Mr. Hayes. This evening a double bill will be presented. "The Cotton King" and the great comedy, "Is Marriage a Failure?" The latter is a gem.

"The Twelve Temptations."

W. J. Gilmore's "Twelve Temptations" attracted an audience at the Grand opera house that filled the theatre. An audience, too, that was not slow in demonstrating its admiration of the magnificent stage settings and striking transformation scenes, applauding the villain when his schemes seemed to go well and applauding the hero when the good triumphed over the bad. In mounting "The Twelve Temptations," Mr. Gilmore has passed the highest mark of the spectacular drama. The scenery is the handsomest ever put on a Milwaukee stage, while the mechanical effects are marvelous. The play abounds in special features. The ballet is strong, introducing three very pretty novelties—the "Policemen and the Flirts," the "Ballet of the Cuckstool," and the "Ballet of the Nations." In the Cockatoo ballet eighteen live birds are carried by as many dancers. In the "Ballet of the Nations" the dancers are attired in gay costumes representing the eight or ten great nations of the world. "The Spider" is an original feature; Wong Chung, a Chinaman, hangs himself by the neck and finally by his queue, his long hair sustaining his own weight and finally that of another man, who grasps the swaying Chinaman by the feet. The donkey and cart and the cab ride are amusing special features. The Brothers Savinulla, who formerly did the grotesque dance in "The Devil's Auction," do an equally amusing dance in "The Twelve Temptations" as the policemen. The dramatic portion of the show is so completely overshadowed by the mechanical and scenic effects that it is but a small part of the attraction. There is, however, an interesting plot that is worked out much closer than is usual in spectacles, and the piece is a better than the average in spectacular dramas. The company is strong.

The dancing of Mlle. Marie Bonfanti and Mlle. Emma Paparillo was heartily applauded. "Twelve Temptations" will be repeated this evening.—Milwaukee Sentinel.

POWDER MAGAZINE CASES.

(Before Edwin Johnson, Q. C., S. M.)

Richard Hall, charged with keeping a powder magazine within two miles of the city, was fined $10.

The Deputy Attorney-General, Mr. P. A. E. Irving, said the powder was removed and it was not the intention to ask for a heavy fine in this case.

Provincial police officer, C. J. Millar, said the witness fees amounted to about $10. His Honor imposed a fine to cover the expenses.

J. H. Turner was charged with keeping a powder magazine within two miles of the city of Victoria.

Deputy Attorney-General Irving appeared for the Supt of Police. Mr. Helmcken, of Messrs. Drake, Jackson & Helmcken, appeared for the defence.

WANT $50,000 DAMAGES.

A Few Property Owners to Petition the Board of Aldermen.

A number of property owners along the stream known as Colquitz river will present a lengthy petition to the Board of Aldermen, claiming the large sum of $50,000 damages for loss sustained by the corporation retarding the flow of water down the stream. Beaver Lake overflows at the dam when the stream is swollen. As the stream takes its rise in this lake it is about dry in summer, owing to no overflow from the lake. Thus it is claimed by the property owners that their property is damaged for lack of water, which they claim should belong to them, and that their cattle and crops suffer in summer in consequence. For this they will ask the corporation for recompense to the extent of $50,000. The cause of all this is the waterworks dam at Beaver Lake, which, it is contented shuts off the natural supply of the stream. The petition has several signatures.

THE SCALDING ACCIDENT.

Coroner's Inquest—A Verdict of Accidental Death Returned.

A coroner's inquest was held at Saanich on Monday afternoon to ascertain the cause of the death of John Frank, the two year old son of Paul Frank. Dr. Jackson empannelled the following jury: John Camp (foreman), John Ford, W. Armstrong, J. D. Bryant, W. Scott and E. Johns. The evidence of the child's parents was taken. They deposed that the child drank a quantity of scalding tea from a vessel left standing on the ground, which caused death at 7 o'clock on Monday morning. After viewing the remains the jury returned a verdict of accidental death.

DEPARTMENT DRILL.

Pumping Salt Water—Two Fire Engines at Work.

The fire department drilled last evening on Yates street. The Tiger steam fire engine was located on Turner, Beeton & Co.'s wharf, pumping salt water to the Deluge engine, which was placed on Yates street, between Wharf and Langley alley. A stream of salt water was passed through the Deluge engine and the combined pressure of the two engines delivered a solid stream through 1000 feet of hose which reached a height of 150 feet. This test was made for the first time in Victoria and proves the value of an extra engine on a long line of hose. The cistern and hydrants were also used and the fire ladders were well tried out before the order to "take up" was given. The stream of water from the wharf reached the Adelphi corner and it was clearly demonstrated that in case of a break in the mains the wharves can be used to locate the engines in case of a conflagration within the fire limits.

THE SEALERS.

Catch of the Fleet of Schooners in the Northern Waters.

On account of the late hour when the schooner Wanderer arrived from Sand Point and the reticence of the owners of sealing schooners it was found impossible to obtain an accurate account of the catch made by sealing schooners in northern waters. On June 28th the following catch was reported; Sapphire, 610; Black Diamond, 283; Maggie Mac, 630; Annie C. Moore, 480; Viva, 872. Theresa, 198; Pathfinder, 558; Walter L. Rich, 923; Venture, 317; W. P. Sayward, 458; Ariel, 283; Juanita, 32; Triumph, 240; Lily L, 520; Bessie Butler, 253; Mollie Adams, 500; San Diego, 800; Fowler, 500; Allie Alger, 253; J. H. Lewis, 242.

POLICE COURT.

(Before Hon. A. E. Richards, Q. C.)

Phillip Chalk, on a charge of drunkenness, was fined $5.

On Sing, intesting the thistle by-law; withdrawn.

Samuel Pearce, on remand, was committed for trial on two charges of embezzlement.

Charles Williams, charged with malicious injury to property; withdrawn.

A Coming Event.

It is estimated by the Foresters of this city that fully 500 visiting Foresters and their friends from Nanaimo, New Westminster and Vancouver will be in attendence at the great demonstration of the order at the Caledonian grounds on August 3rd. Special rates from the above cities have been made for the occasion. The affair is spoken of as to be grand.

Purchase of Novelty Iron Works.

In another column notice is given that Mr. A. N. Munro has been admitted as a full partner in the business of the Victoria Machinery Depot, which will continue to be carried on as heretofore by Messrs Gray and Munro under the firm name of Spratt & Gray. Having purchased the Novelty Iron Works, formerly owned by Mr. Gowen, including patterns, machinery, etc., the firm are in a better position than ever to fill the demands of their constantly increasing business. The business qualities of the new firm do not require comment.

THE BRITISH COLUMBIA FIRE INSURANCE COMPANY.
TAKES RISKS ON THE CASH OR MUTUAL PLANS.
As this is a Home Company, organized by British Columbians for the two-fold purpose of giving cheap insurance and keeping the money in this Province, it commends itself to the support of every insurer desiring the prosperity of this country.
In Ontario, the system of insurance, which is similar to that adopted by this Company, has been in highly successful operation for the past fifty years, and it has proved to be a great advantage to every insurer in it, by reducing the cost of insurance, and it is estimated that now three-fourths of the insurance effected in Ontario is carried by mutual companies.
